Share Free-to-Air TV to your Fetch Mini

You can share Free-to-Air channels to your Fetch Mini from a paired Fetch Mighty or Gen 2 box. So you don’t have to connect your Mini to your TV antenna. (Your paired Fetch Mighty still needs a TV antenna connection to receive and share digital Free-to-Air TV).

You can’t share Free-to-Air channels from one Fetch Mighty or Gen 2 box to another.

How does Multiroom work?

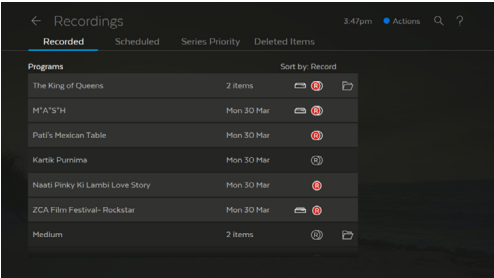

All your Fetch boxes need to be on the same account with your Fetch Service Provider, powered on and connected to your local network. You can then share subscription channels, rentals and purchases.

To see recordings on your Fetch Mini, enable Multiroom at [Menu > Manage > Settings > Multiroom > Options](#) (Page 35). This is also where you can choose another box to pair to your Fetch Mini (if you have an extra Mighty or Gen 2 box). You can pair one of these boxes at a time to set or manage recordings on them.

If you've no antenna connected to your Fetch Mini, you can share Free-to-Air channels from a paired Mighty or Gen 2 box.

The Gen 2 Fetch box, Fetch Mighty, and Fetch Mini all support Multiroom sharing.

For more info on Multiroom, download the [Multiroom User Guide](#) from [fetch.com.au/guides](#)

- 2 Select a TV show. The show names and number of seasons and episodes available are shown.

- 4 To buy an episode or season, you'll be asked to enter your Parental PIN and press . You can choose to buy the SD or HD format if available.
Once you confirm the purchase the amount will come off your credit card for Fetch retail customers or will be added to your next month's bill from your Fetch Service Provider.
- 5 If your purchase is successful the first available episode will be ready to play.

Cost to buy TV episodes and seasons

TV episodes cost \$3.49 for HD and \$2.99 for SD. The price will vary on occasion when specific sales might be on.

Season prices will vary depending on how many episodes are in the season, but you do save money buying the whole season rather than the individual episodes.

Episode purchases don't count towards a Season purchase, so if you think you want to watch the whole season it's better to buy it all at once.

Note

You may watch the first episode of some shows free of charge. Look for the  icon on the show or go to [TV > TV Store > Try 1st](#).

Channel Packs

What's the Entertainment Pack?

What's in the Ultimate Pack?

Upgrade to the Ultimate Pack for all the Entertainment channels and more. The Ultimate Pack includes all four Skinny Packs: Vibe, Variety, Knowledge, and Kids.

If you prefer, you can also add just one or two Skinny Packs rather than the Ultimate Pack. If you try to add all Skinny Packs, we'll prompt you to get the Ultimate Pack as this is more cost-effective.

If you have the Entertainment Pack, you'd need to remove it before you can upgrade to the new Ultimate or Skinny Packs.

For more info on available channels, go to: fetch.com.au/packages

Can I downgrade from the Ultimate Pack?

To downgrade from the Ultimate Pack to one or more Skinny Packs, you'd need to remove the Ultimate Pack first. You can then add just the Skinny Packs you want.

You can play video, music and image files from your computer, phone or tablet on your TV using your Fetch box.

The easiest way is to plug a USB into the side of your Fetch box.

If you have a home media server you can also access files wirelessly straight from your computer on your TV using your Fetch box.

For more information, download the My Media Hub User guides for USB and Media Servers from fetch.com.au/guides

Menu > My Stuff > My Media Hub

12 Settings including Parental Controls

There are lots of things you can do in the Settings area at [Menu > Manage > Settings](#). Here we outline the most commonly used ones.

Set up for channels

Access the Free-to-Air (FTA) frequency scan that identifies and tunes all visible channels. You can also add your favourite channels to your Favourites list or hide selected channels.

Optimise your sound and display

Select [Audio & Visual > Video](#) to optimise your TV screen display. To refine your video settings if needed, choose [Advanced](#). In [Audio](#) you can turn on Surround Sound 5.1 if using a surround sound system. Select [Bluetooth](#) to pair headsets, speakers, or phones. For more information see Page 36.

Mobile & Tablet

Find your Activation Code (also called Fetch ID) which you need to sign in to the Fetch Mobi App. Then you can control your Fetch Mini like a remote control from your mobile device. See the Mobile App Guide at fetch.com.au/guides for more information.

In the **User Preferences**, you can change your PIN, your viewing options, and find the Activation Code / Fetch ID for your Fetch Mini. Use  to select an option and press .

Share content between your boxes

In the Multiroom settings you can turn on Multiroom so you can watch recordings on other Fetch boxes in your home from your Fetch Mini (Page 14). If you've got more than one Fetch Mighty or Gen 2 box, you'll also be able to pair to one of them here, so that you can set and manage recordings on that box from your Mini.

13 Pair a Bluetooth Device

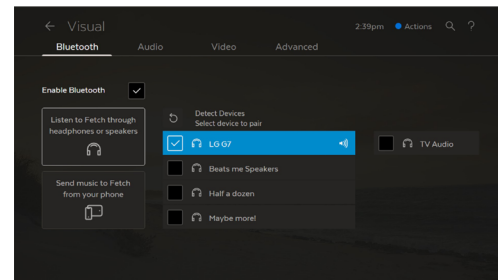

You can pair your own device such as headphones, speakers, or phones via Bluetooth to your Fetch Mini. So you can listen to Fetch without disturbing anyone else in the room via headphones, or play music from your phone on your Fetch Mini and TV.

To pair headphones or phone using Bluetooth

Power on your headphones, speakers, or phone and make sure the device is ready to pair. For phones, remember to turn on Bluetooth in the device settings.

Go to [Menu > Manage > Settings > Audio & Visual > Bluetooth](#).

- 1 If not selected, tick [Enable Bluetooth](#). Bluetooth will be on automatically if using a Bluetooth Remote to control your box (page 40).
- 2 To pair a Bluetooth headset, choose [Listen to fetch through headphones or speakers](#).
- 3 To pair your mobile device, choose [Send music to Fetch from your phone](#).
- 4 Select  to scan for your device then choose the device name on the screen to pair.

Note

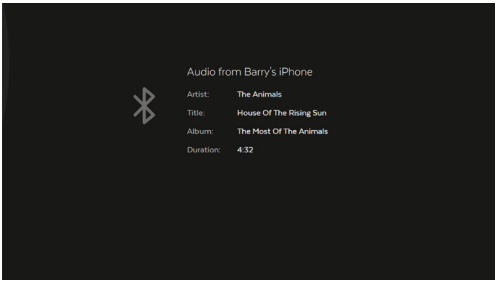

- Bluetooth pairing is only supported on the Fetch Mighty and Fetch Mini. It's not supported on Gen 2 boxes.
- You can't currently pair an Apple iPad to the Fetch box via Bluetooth.

Listen to Fetch through headphones or speakers

When listening to Fetch through Bluetooth headphones you can control the volume and pause or play from the device. When watching TV with others in the room you can listen to Fetch through both the headphones and TV. Select **TV Audio** in the Bluetooth settings. You can then change the volume on your headphones without affecting the box.

Send music to Fetch from your phone

When you pair your phone to your Fetch Mini via Bluetooth, you can pick songs from your music library or an app to play on your TV. Any audio you play from your phone – such as Snapchat, Instagram, YouTube, and Spotify – will play on your paired Fetch Mini and TV.

Tips and help for Bluetooth

If you are having trouble using Bluetooth on Fetch to listen through headphones, speakers, or smartphones, here are some things to try:

- 1 If you can't pair headphones or speakers to your Fetch box, check your Bluetooth device is in "pairing mode". On headphones this is typically shown by a flashing light.
- 2 Check if your Bluetooth headphones are paired to another device. If so, disconnect them from the other device then try to pair to your Fetch box again.
- 3 Make sure you're in range of your Fetch box and there's no interference from nearby devices like wireless speakers or cordless phones.
- 4 Make sure your Bluetooth device is fully charged, or try changing the batteries in the device. Try turning Bluetooth off and on or restarting your device to see if this helps.
- 5 Check for firmware updates on your Bluetooth device.
- 6 Check that you can pair your Bluetooth device to another device. If you can't, then you may need to seek help from your Bluetooth device manufacturer or documentation.
- 7 If you replace faulty Bluetooth headphones or speakers you were using with Fetch, you should 'forget' the device. Go to [Manage > Settings > Audio & Visual > Bluetooth](#) and press . This will stop the box from trying to pair to an old device.
- 8 If you can, turn off Bluetooth on your Fetch box when you're not using it. (So your device doesn't pair to your Fetch box whenever you're in range). Go to [Manage > Settings > Audio & Visual > Bluetooth](#) and untick [Enable Bluetooth](#). If you've paired the Fetch Voice Remote via Bluetooth (Page 40) you can't turn off Bluetooth as the remote needs a Bluetooth connection for voice control.
